

Rowan visit the Bell Foundry Museum

On 15th September Rowan class travelled to Loughborough to watch the bells from Nassington Church being cast.

We ascended a spiral staircase and watched from the balcony as the bell metal was poured into a big metal bucket.

We watched a DVD explaining the process and were treated to a tour of the foundry.

We saw lots of machinery and learned about how the bells are tuned to different pitches.

We climbed up to the foundry bell tower and even had a go at some bell ringing. We look forward to visiting the bells when they are complete and are returned to the church.
