

Sports Premium funding 2014/15

Nassington School's Sports Premium allocation for the academic year 2014/15 is **£8069**. This has been spent on a range of enhancements to curricular and extra-curricular activity in the school, detailed as follows.

Sports Partnership Enhanced Package

After the success of the Enhanced Sports Premium Officer's (ESPO) work in the school over 2013/14, we decided to continue working with the partnership to develop our provision. The impact of the work has been significant, including but not limited to

- New scheme of work sourced and implemented
- Assessment strategies developed
- Curriculum mentoring
- Policy, development plan and action plans in place
- School Games Silver Mark (improved from Bronze in 12/13)
- School Sports Crew set up
- Increase in competition entry at levels one and two
- Increase in participation in PE
- Increase in participation in extra-curricular physical activity
- Change 4 Life club to engage less active pupils

This work has been developed this year by

- Yearly action plan completed
- Three year policy document
- Three year development plan updated
- Real PE mentoring for Reception (2 terms)
- Real PE mentoring for year 1/2 (2 terms)
- Tag rugby mentoring for year 3/4 (1 term)
- Supporting Something to Chew on programme
- Curriculum mapping for year
- Resource inventory
- Resource ordering
- Management of SSC

As a small school in a transitional period, focus for ESPO work at Nassington has been on keeping up the momentum of change in PE and ensuring that delivery remains of a sufficiently high quality through a period of unusually high staff turnover and change.

The ESPO has worked with teachers where possible to improve their practice, and has also worked closely with support staff to ensure that PE is accessible for two pupils with autism. This has involved building strategies for better understanding of tasks, allowing for the pupils in question to be able to learn in their own way and at their own pace.

The current staffing position in the school has also led to a need for the ESPO to offer high levels of support to the PE coordinator. This has involved managing the SSC, supporting staff with planning, arranging additional provision (e.g. fencing) and implementing assessment criteria.

There has been a further increase in participation in physical activity, competitions and extra-curricular clubs. The development in quality of curriculum provision is evidenced by achieving Silver accreditation from the Youth Sport Trust, and the school is on course to increase its School Games and YST ratings to Gold by the end of this academic year. This will be achieved by

- Increasing extra-curricular participation to >50% of pupils per week
- Increasing links to local clubs
- Training year 4 pupils to be young leaders
- Entering B and C teams to competitions where possible

Total cost of the ESPO package this year is **£3,300**. This includes entry to all partnership competitions, membership of the Youth Sport Trust, access to free CPD, access to a wide range of additional PE and sport resources and programmes, and the services of a PE specialist for half a day every week for the duration of the school year.

Healthy and Active Lifestyles

In addition to change 4 life club, the sports crew are planning a sports and healthy living day, in which pupils will experience a range of activities aimed at encouraging healthy lifestyles. Pupils will be encouraged to walk, ride or scoot into school, and the older pupils will put into practice the skills learnt during the Premiership Rugby Something to Chew On programme they undertook in the Spring term.

The school has met with the county healthy living officer and plans to work closely with Northamptonshire CC to develop programmes in this area. **£1000** has been set aside to spend exclusively in this area, though other funding is available.

Curriculum and Resources

Further staff training in Real PE will be undertaken in 2015 in preparation for transition to two tier education in 2015/16. Additional schemes of work and relevant resources are also being purchased, with **£2000** being allocated to CPD and curriculum development.
